About Me

I am a passionate Web Developer who thrives on challenges and enjoys learning new technologies. With professional experience since 2018, I have developed strong adaptability and a fast learning ability, allowing me to quickly adjust to new projects, clients, and technologies. Having worked on various projects and teams, I am comfortable collaborating in a team environment as well as working independently. I am committed to delivering efficient, scalable, and high-quality solutions that meet both technical and business goals.

Bachelor of Informatics Engineering

STMIK Akakom Yogyakarta
2014–2018

Skills

React

Angular

Laravel

.NET Core

Flutter

Strapi

Filament

Work Experience

Frontend Engineer – Triniti

Sept 2023–Present

Dedicated Staff at Triniti. Sydney – Remote

I specialize in turning Figma designs and business workflows into responsive, user-friendly applications using React and Strapi. I collaborate with cross-functional teams to ensure smooth frontend–backend integration and maintain high code quality.

Currently expanding my skills toward Fullstack Development by learning .NET Core for backend services, API integration, and server-side logic.

Frontend Engineer – Softwareseni

Feb 2023 – Aug 2023

Yogyakarta – Remote

Projects:

- Pear – Resource management application.
- Biomedilab – Online booking system for medical check-ups.
- Responsibilities:
- Developed and maintained web and mobile apps using React and Flutter.

Angular Developer – Softwareseni

Dec 2021 – Jan 2023

Dedicated Staff at Akar Inti Teknologi (BCA Project – Supply Chain Finance). Jakarta – Remote

- Built and implemented application designs using Angular.
- Collaborated with a team of 10 (5 frontend, 5 backend).
- Translated Figma designs into responsive user interfaces.
- Focused on robust, scalable frontend solutions and strong team collaboration.

Angular Developer – PT NTT IDBS

Dec 2019 – Dec 2021

Dedicated Staff – BCA (via Emerio).

- Developed and maintained web applications using TypeScript and Angular.
- Delivered clean, efficient, and scalable code aligned with business requirements.
- Collaborated with cross-functional teams to enhance system performance.

Associate Developer – Ebiz Cipta Solusi
South Jakarta

Oct 2018 – Dec 2019

- Developed and enhanced an e-procurement application by adding asset export and import modules.
- Created stored procedures for data migration processes.
- Conducted research to support product upgrades from AngularJS to Angular 4 and from .NET Framework to .NET Core.

Freelance Software Engineer – Self-employed
South Jakarta

Jan 2020 – Present

Projects:

- Portal BUW – Administrative app for BNI Yogyakarta (Laravel).
- I'Tau – Card distribution tracking app (Laravel, Flutter).
- Silakia – Middleware app for Excel data mapping between external and internal BNI systems (Laravel).
- Company Profile Websites – Built several company profile sites (Laravel).
- Expedition App – Logistics management and package tracking (Laravel).
- E-Commerce Platform – Built using Filament and Laravel.
